The train came from Aken []

Comments.

(1) These trains with Volkspolizei are probably for the activation of the 1st VP corps or army in the Eastern Mecklenburg area. The trains are believed to be reported for the first time.

(2) [] the troop train to Dallgow-Doberitz []

The troop train to Angermuende mentioned in paragraph 2 of the present report is reported for the first time.

(3)

Juetterbog-Altes Lager to Lieberose. [] The troop train mentioned in paragraph 3 of this report carried an element of the 288th Gds AAA Regt [] of the 7th Gds Mecc Div, which probably returned from firing practices at the Juetterbog troop training grounds. The 288th Gds AAA Regt is thus confirmed until 18 August 1952. [] signal units of the GOCG were shipped to Wildpark; the dispatching station, however, was Wuensdorf. The troop train from Juetterbog to Wildpark on 18 August mentioned in the present report is probably identical with the troop train [] which was previously reported. [] The troop train from Juetterbog on 25 August 1952 mentioned in paragraph 3 of the present report cannot be identified. [] however it may be possible, that [] was confused [] the 66th Sig Regt (US) of the GOCG in the Potsdam area.

(4) Additional shipments of materiel to the area, in which the 1st VP corps or army is being activated, were observed leaving Fuerstenwalde [] between 16 and 21 August 1952. [] The shipment from Aken mentioned in paragraph 4 of the present report compares with the same observation made [] at the Eberswalde railroad station.

(5) The train carried artillery units of the 1st Mecc Div which probably continued their firing practices at the Juetterbog troop training grounds which had begun in late July 1952.

(6) The data generally agree with the statements [] on the Eggesin-Torgelow area.
